

# Inventoria

## Stock Management Software

Easily track stock levels and manage inventory processes in your business.

- ▶ Manage stock levels by category, location and supplier
- ▶ Easily create and send purchase orders to vendors
- ▶ Web access mode for remote management

Inventoria allows businesses of all sizes to efficiently track all their inventory processes, whether for one small retail outlet, or a chain of stores and warehouses across several locations. Easily manage stock quantities, transfer between locations, set low level alerts, generate and send purchase orders from within the program, and more.

### Features
